- maximum height: 2,750 mm (external frame dimension)
- with ceiling tracks
- 4 model variants
- 5 standard colours
- Smooth surface
- Wicket and side entrance doors
- door handles

## Special versions

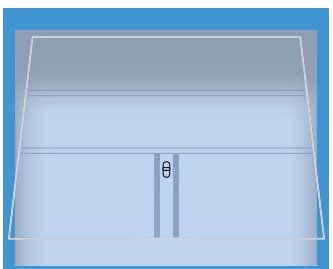

### RENOVATIONS

As an option, doors up to 3,000 mm wide can be fitted with a three-sided renovation frame for installing the door between the reveal. The renovation frame is finished in the same standard or special colour as the door leaf.

### INDIVIDUAL SURFACE

To give your personal creativity free rein, our up-and-over doors are also available without a factory-fitted covering. You determine the material and appearance yourself. Your garage door will look particularly aesthetically pleasing with your individually selected overlay if the door and façade harmonise perfectly.

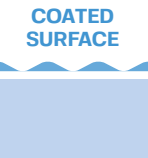

## Highlights

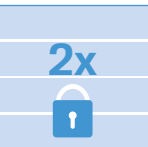

### QUIET & SMOOTH DOOR OPERATION

The door runs quietly and smoothly at all times thanks to the ball bearing mounted rollers and the door guide in the over-head track.

### DURABLE SURFACE FINISH

The end-treated surface is coated with organic polyester. This minimises the development of rust and maximises the durability of the goal. The decking consists of a beaded T10 trapezoidal profile.

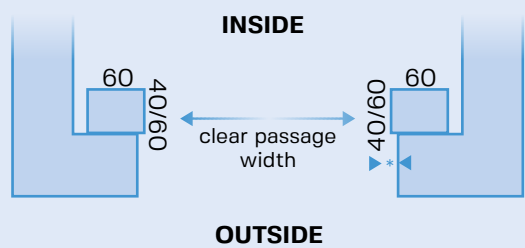

### DOUBLE BURGLAR ALARM

The secure two-point locking mechanism engages automatically and provides protection against unauthorised access (during manual operation).

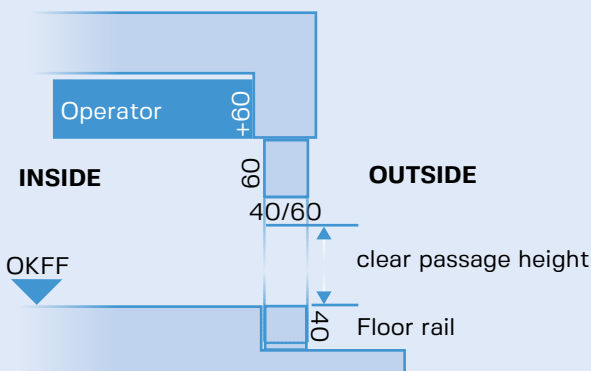

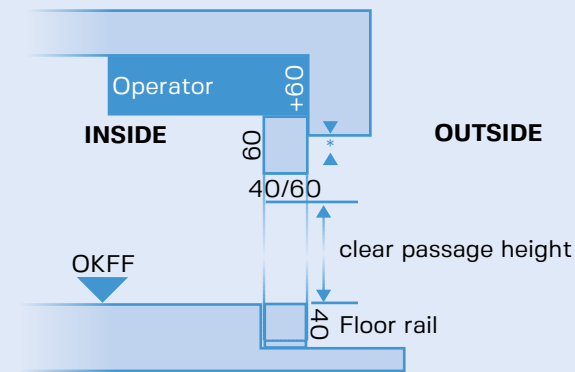

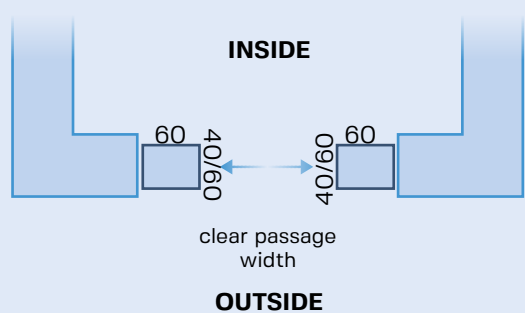

## Installation

### BEHIND THE REVEAL

\* Dimensions / frame depth Depending on the situation

### BETWEEN THE REVEAL

# Colors

## STANDARD COLORS

The first impression is crucial. So take the time to find the colour for your up-and-over garage door that best suits your home.

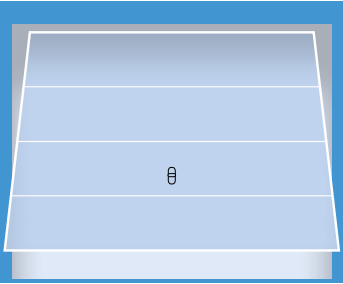

Our standard colours are some of our customers' favourite colours and offer a variety of shades that can further enhance the overall aesthetic of your home.

Trafic white (sim. to RAL 9016)		Light gray (sim. to RAL 7035)
White aluminium (sim. toRAL 9006)	Sepia brown (sim. to RAL 8014)	Anthracite gray (sim. to RAL 7016)

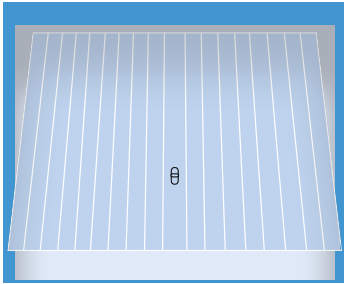

In addition to choosing from our standard colours, you can have your new door painted in a special finish in almost all RAL colours (except pearl effect and fluorescent colours).

# Models

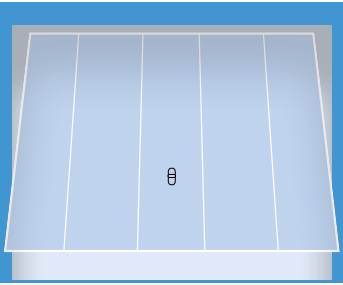

Beading has a fundamental influence on the design of your new garage door. Whether modern or traditional – the choice is yours. Select a model from our range that suits your taste.

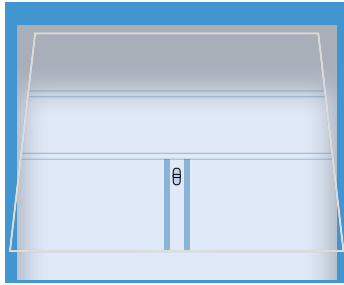

**STYLE**  
Strength lies in tranquillity. With the Style model, unagitated design meets simple elegance. Simply pure aesthetics.

**PROMINENT**  
This design is characterised by the elegant beading. The uniform parallelism of the vertical lines creates a highly attractive visual dynamic and rhythm. Pleasing to the eye – all along the line.

**ELEGANT**  
The Elegant model impresses with its classic design. Robust and durable thanks to the end-treated surface. This up-and-over door is aesthetically pleasing and sophisticated.

**VARIANT**  
To give your personal creativity free rein, our up-and-over doors are also available without a factory-fitted covering. You determine the material and appearance yourself.

# WICKET DOORS- & SIDE ENTRANCE DOORS

Side entrance doors are available in the Prominent, Elegant, Style and Variant models. To ensure that you always have everything under control, our doors are fitted with a black plastic lever handle set as standard. Our Prominent and Variant door models are also available with a practical, integrated wicket door (opens outwards).

## WICKET DOORS

For up-and-over doors with an external frame height of up to 2,400 mm, we offer wicket doors at the same height as the door. For up-and-over doors with an external frame height greater than 2,400 mm, the wicket door height is generally 1,940 mm. The clear width of the wicket door is 860 mm. The illustrations show the possible positions of the door handles and door fittings, the wicket doors open outwards.
